

AVENTYN FACT SHEET

Company

[Aventyn, Inc.](#) is an early stage health technology company committed to delivering innovative, standards based secure core to cloud Connected Clinical Information Processing solutions and services with lower healthcare delivery cost, improved quality and increased patient safety. Aventyn vision is to help improve quality of life through better healthcare. Aventyn is the first company to deliver a connected clinical information processing software platform using its unique interoperable ehealthXML™ technology and healthKrypt™ security technology. Using this technology, Aventyn delivers solutions that securely connect clinicians and patients, enables health information interoperability by connecting patient-centric health information for anytime, anywhere, anyplace access. Our patent(s) pending building blocks connect and secures global health provider, payer and patient health information, applications, diverse mobile devices and cloud solutions. We are a California –S Corp. Company based in Carlsbad, USA with offices in London, UK, Bangalore, India with representation in Sweden and can be contacted by email at info@aventyn.com.

Technology and Products

Aventyn's unique modular architectural approach to build secure connected health information software is a key competitive advantage. We develop solutions that take on the toughest health information interoperability and information security challenges on current and emerging computing platforms. Our [CLIP®Care](#) electronic health record solutions with [CareLock™](#) health information security and integrated wireless bio-sensor capability enables secure continuity of care anytime, anywhere and anyplace. [Vitalbeat™](#) integrated chronic disease management algorithms are patient personalized with solutions tailored for home and remote monitoring, case and community health management.

- **Comprehensive, Electronic Patient Record, Clinical Decision and Imaging Solutions**
- **Chronic Disease Management, Vital Sign Monitoring with Wireless Health Mobile Devices**
- **Enables Diet and Medication Compliance with Personalized Treatment Plans**
- **Pathway for Care Coordination from Provider to the Independent at Home**
- **Improved Health Data Security for HIPAA and HITECH Act Compliance**
- **Provides Unique Identification, Authentication and Encryption for Medical Banking**

CLIP is built on the cornerstones of **Interoperability, Security, Scalability** and **High-availability** and to lower operating costs, improve care quality and increase patient safety. Our offerings are certified to work on diverse leading edge mobile, back-end server and cloud computing platforms.

Customers

Our technology components and products are deployed at care Providers, Payors and Operators. Services Providers deliver licensed turnkey, customized solutions using our broad technology offerings. We offer bundled and per patient per month subscription to providers and patients with our strategic partners.

Founded 2004

The company was founded by senior industry veterans from Intel Corp, Tarari, Ericsson, Accenture, Karolinska, VIVUS Health, GE, Siemens and St. Jude Medical with over 100+ years of combined experience and proven successes. Aventyn leadership team and advisory board have highly credible and recognized global technology, clinical and academic research leadership in health IT, security, wireless, enterprise software, medical devices, semiconductors and most importantly, delivering efficient health care with IT solutions. Aventyn is a privately held company, more information can be found on the web at <http://www.aventyn.com>.
