Product - CLIPCare

Patient-Centric Clinical Information Solutions Driving New Levels of Efficiency and Quality in the Delivery of Healthcare.

Our Cloud and Web based products enable hospitals, physician offices, university medical centers, home care providers, hospices and clinical researchers to manage patient health records, track assets, capture charges, and transmit and process electronic prescriptions. As a result, healthcare providers are able to dramatically improve healthcare delivery efficiency and quality.

Aventyn's initial offering to the Healthcare enterprise is the connected Clinical Information Processing Platform with complete CLIP[®]Care and Vitalbeat software application suite, middleware products and services associated with the deployment and use of its software products. Our products can be securely configured for local IT intranet deployment or as Cloud based services.

Features

- Secure web-based, remote and local host log-in capability
- Comprehensive electronic health record and asset management
- Seamless patient administration from admission to discharge
- Lab and Radiology investigations, ePrescription and ePedigree applications
- DICOM compatible multi-modality, multi-view for radiology with moving images
- Integrated RFID for patient identification and medication
- Streamlined clinical and financial work-flow management

Intel® Hybrid Cloud Program

Intel® Hybrid Cloud program, featuring the Intel AppUpSM Small Business Service, is an innovative service that offers powerful hardware and software solutions according to your needs and on monthly subscription basis.

Intel® Hybrid Cloud program consists of 3 key components

Server:

Intel® Xeon® processor based Servers that may be chosen from the options available in the catalogue based on your requirements.

Software Packages:

Easy access to a large collection of business-related standard ISV software – at a click of a button

Server Management:

Your Service Provider manages the server as and when required

What are the benefits for you?

- **Affordable technology for your business growth** - Compared to a completely hardware-hosted or pure cloud solution, it provides more value for your business since you don't need to invest a huge amount when starting up.
- **Use according to your business needs** - You can grow or reduce monthly software costs or even choose different software as business conditions and the number of users change.
- **Hassle-free payment options** - Pay for software on a monthly usage basis according to the number of users and usage.
- **Service providers manage your solutions** - Service providers, who are technology experts, will remotely manage the server and solutions which are at your business premise. And on-site support is also provided as and when the need arises.
- **A completely secured solution at your premise** - Your highly sensitive data and critical information is stored in your office premise and under your control.
- **Save unnecessary costs** - With the server and on-site support managed by the service provider, you don't need to spend on a dedicated IT workforce. Also, you will save on unnecessary expenses since you will be paying according to your business usage.

Take this perfect opportunity to implement a highly efficient technology solution without worrying about the cost and complexities. **Embrace Intel® Hybrid Cloud now!**
