Innovative Connected Solutions

Aventyn is an award winning digital health company delivering innovative, standards based secure core to cloud connected clinical information solutions and services to lower health care delivery costs, improve quality and increase patient safety

Aventyn provides clinical evidenced solutions for personalized patient monitoring, medical imaging, analytics and genome reporting for health providers, insurers, pharma-life sciences, pharmacogenetics and population health management

Improving Care Coordination and Patient Engagement

Vitalbeat® is an easy to use Integrated Chronic Disease Management system for use by patients and clinicians. Vitalbeat is a clinical evidence based digital therapeutics platform personalized for patients to stay healthy. With the Vitalbeat platform, it is now possible for clinicians to remotely monitor patients using wearables, mobile devices, IoT enabled cloud platforms to design long term disease management programs for improved care quality at lower cost. Patients, physicians, and healthcare providers securely record, share and manage interoperable health data. Users can manage diet and medication compliance by configuring alerts and reminders baselined to meet personal goals, thresholds and clinical guidelines. Secure access to health coach social networking sites provide group sharing and networking with like-minded friends and groups. Now, Vitalbeat solutions are available in consultation from healthcare professionals and select service providers

Vitalbeat has been validated in a clinical study ***REMOTE-HF-1** for expanded uses in management of patients for chronic disease management and remote monitoring. The trial was registered in the United States FDA clinical trials registration site under NCT01430936. The American Heart Association validated the scientific and outcomes data from the **REMOTE-HF-1** clinical feasibility study presented at the **AHA Scientific Sessions 2014**

Vitalbeat is not intended to replace emergency medical responses
